**M**ake your home more energy efficient with these tips. You can find other great energy-saving ideas at [www.vectren.com](http://www.vectren.com).

- Upgrade the largest consumer of natural gas in your home, the furnace, to a high-efficiency unit.
- Install a programmable thermostat and set it back 5° for eight hours a day—saving you 5% on energy costs.
- Upgrade to a high-efficiency natural gas water heater and find simple ways to use less hot water, like installing low-flow showerheads.
- Open curtains during the day to let the sunlight in, which saves you up to 2% in heating costs.
- Apply caulk and weatherstripping around your windows and doors, which saves you up to 10% on heating and cooling costs.
- Add insulation to your attic and walls to save up to 30% on heating and cooling costs.
- Replace your clothes washer with an ENERGY STAR® model, which uses half as much energy and water.

#### ONLINE ENERGY AUDIT

Take vectren's online energy audit at [www.vectren.com](http://www.vectren.com) to see how much energy you use, ways to reduce energy consumption and how to save money.

**V**ectren puts the power to manage your energy bills in your hands. From online energy audits to rebates that are available on a variety of natural gas appliances such as furnaces, water heaters and more—we're giving you the tools necessary to lower your energy bill.
